Database Business Rules

These rules belong to the Xpression database design. The application or the database must enforce them. No tables are created in this sprint.

Identity

1. An account email is unique.
2. An account has one role: Creator, Mentor, Talent Scout, Moderator, or Administrator.
3. A Creator, Mentor, Talent Scout, Moderator, or Administrator rectangle on a diagram is an Account of that role. The person is not stored again in a second account table.

Creator

4. A creative work belongs to one creator.
5. A creator can publish many works.
6. A music piece must have a SoundCloud URL. Writing and visual art do not.
7. Media type is Writing, Visual art, or Music.
8. Featuring, archiving, editing, or removing a piece updates that Creative Work. It does not create a second portfolio record.
9. A creator reads only feedback written about that creator's own work.

Mentor

10. A review request belongs to one creator, one mentor, and one creative work.
11. A creator can submit many review requests. A mentor can receive many review requests.
12. Request status is waiting, accepted, or declined.
13. Structured feedback is stored only when the related review request is accepted.
14. Feedback must include strengths, improvements, and a recommendation.
15. Feedback belongs to one work and one mentor.
16. A feedback has at most one creator reply.
17. A nomination belongs to one mentor and one creative work.
18. Nomination status is pending, approved, or declined.

Talent Scout

19. Scout search reads creator discipline, open_to_commissions, and the creator's creative works. Search does not insert a row.
20. A scout message belongs to one talent scout and one creator.

21. An opportunity belongs to one talent scout.
22. Invitation is the only link between an opportunity and a creator. One creator is invited to the same opportunity only once.
23. Invitation status is sent, accepted, or declined.

Moderator

24. A work report belongs to one creative work. A work can have many reports.
25. A work report opens one moderation case.
26. A moderation case records findings, the action taken, and a status of open, in review, escalated, or closed.
27. The action taken on a work is kept available, hidden, or removed.
28. A user report belongs to one account.
29. A moderator may warn, restrict, or refer an account for a ban.
30. A moderator does not ban an account. Ban is an administrator status change.

Administrator

31. An administrator can activate, suspend, ban, or deactivate an account.
32. Each of those actions stores the new status on the account and one Status Change row.
33. A role application requests Mentor or Talent Scout. Creator accounts are not approved through this application.
34. Application status is pending, accepted, or rejected.
35. An accepted application is what allows that person to use a Mentor or Talent Scout account.
36. An analytics report stores the report type, the start date, and the end date chosen on the screen.

Later requirements

37. A comment belongs to one creative work.
38. A follow links one account to one creator, and that pair is stored once.
39. A saved work links one account to one creative work, and that pair is stored once.
40. A help ticket belongs to one account.
41. A platform setting name is unique.
